Big Questions in ELT

My first digital journey

Chapter five: Pronunciation

App: Sounds

Interactive phonemic chart

Works with: iPad / iPhone

#### Description:

This is the app version of the well-known phonemic chart, created by ELT author Adrian Underhill. Tap a symbol to hear the sound; tap and hold to hear the sound and an example word. Contains a wordlist of around 650 words.

At the end of the lesson, write up a list of words which students have had problems pronouncing. Students use the app to work out the phonemic script of each word. They come up to the whiteboard and write it up.

This app provides three ways to practise the sounds of English: read, write and listen.

Read: presents the phonemic transcript of a word - students use the regular keyboard to tap in the word itself.

Write: offers the reverse - student sees a word selected from the wordlist and then types in the phonemic transcript, using a special keyboard.

Listen: click on an audio symbol to listen to a word and then type in the phonemic transcript.
